❖A Bright and Prosperous New Year to You from the Amarna Consult Team❖

❖Staff Spotlight❖

Marshall Magloire

Engineer Assistant / Site Supervisor

Marshall joined the Amarna team in June 2013 and has worked on several of our projects including: Kittitian Hill, Mount Liamuiga, etc in St. Kitts where he drafted the Structural Drawings for these projects. Marshall also drafted the civil works for the Park Hyatt Road, St. Kitts and produced the Civil Works for the Mervyn Ali Development in Trinidad, Rendezvous Hill, St. Kitts and St. Lucia's soon coming "Belair Estate Development". Also, Marshall has been managing the site at Koi Resorts and Residences in St. Kitts since January 2015. For 2016, the crew at Koi is expected to complete blocks A&B, the back of the house (utility) building, and an extension to the private villas for which he also drafted its structural drawings. Currently, Marshall is pursuing his Bachelors of Science Degree in Construction Management at the University of Reading, College of Estate Management and is expecting to graduate in the year 2017.

⌘ Ongoing Projects ⌘

St. Lucia:

After a couple months delay due to procurement issues, **the Guesneau Slope Stabilization and Road Reinstatement project** has finally kicked off. The project is critical to restoring road connectivity between the communities of Babonneau and the communities of Ti Rocher and Forestiere. Currently one of our Engineering Technicians, James Edgar is supervising this site.

Dominica:

Dominica Agricultural Feeder Roads

Amarna Consult has produced design reviews for 10 feeder roads in the Commonwealth of Dominica. Amarna will be responsible for the supervision of the upgrade to this road infrastructure for 70km of agricultural roads under an EU Funded project. The project is currently in the tendering stage and is expected to commence within the first quarter of 2016.
